

Secure AI Advisory

AI Adoption Done Right

Secure AI Advisory provides a structured, intelligence-driven approach to safe AI adoption, giving organizations clarity, oversight, and measurable risk reduction from day one.

AI is being deployed faster than organizations can secure or regulate it. This gap increases the risk of data exposure, misuse, and emerging AI-specific threats across the lifecycle.

Secure AI Advisory enables organizations to scale AI safely by establishing governance, ensuring regulatory readiness, and assessing key risks. The service clarifies controls, exposes compliance gaps, and delivers prioritized actions that reduce exposure and improve operational confidence.

The Check Point Services Advantage

Powered by global threat intelligence

Led by specialists in AI governance, risk, and compliance

Vendor-agnostic across platforms and models

Common Challenges Secure AI Advisory Resolves

1

Unclear governance as enterprise AI adoption expands

2

Ambiguous regulatory and compliance expectations

3

Limited insight into the most consequential AI risks

Hands-on training to build lasting in-house capability

Key Components for Full AI Oversight

AI Governance Framework & Policy Design

Develops the customer’s AI governance policy, including defined roles, decision rights, and control mechanisms that establish a clear, organization-wide foundation for responsible AI usage.

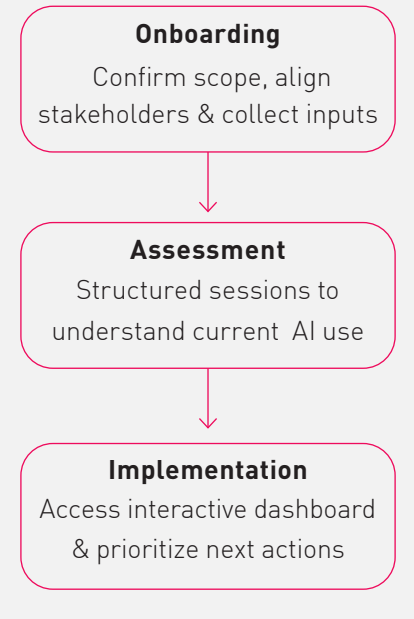

AI Regulatory Readiness & Compliance

Aligns the customer’s AI use with regulatory expectations by clarifying obligations, identifying compliance gaps, and defining required remediation (EU AI Act, GDPR, sector regulations, ISO42001/NIST AI RMF).

AI Risk & Impact Assessment

Strengthens the customer’s AI posture by assessing security, operational, ethical, and regulatory risks, and prioritizing targeted mitigation.

How It Works

Offering Overview

Secure AI Advisory is available in three tiers designed to support organizations at any stage of AI maturity; all tiers include annual dashboard access, with deeper guidance and remediation support available as needs grow.

Component									
	Essential	Enhanced	Total						
Annual access to interactive AI Risk & Compliance dashboard	✓	✓	✓						
AI Governance Framework & Policy Design	✓	✓	✓						
AI Regulatory Readiness & Compliance Advisory		✓	✓						
AI Risk Impact Assessment			✓						
Strategic Advisory Time (Up To)	5 days	20 days	40 days						
AI Practitioner Training	1 seat	1 seat	2 seats
